

# UA Capstone Tours

Ethan Gaddis, Jacob Childers,  
& Walter Mink

# General Motivation

Why this project?

There is no dedicated,  
in-depth, self-guided  
UA campus tour

Existing campus maps  
lack storytelling and  
context, not suited for  
tours

Visitors often explore  
campus without a  
guide

# General Motivation

Who is this project for?

01

Visitors and  
guests exploring  
campus  
independently

02

Students and  
faculty leading  
informal tours

03

Prospective  
students,  
families, and  
new hires

# App Features

## Core Experience

Mobile-friendly web app

Interactive map of the UA campus

Geotagged landmarks and buildings

# App Features

## Key Functionality

Live location tracking (with permission)

Static map mode for remote users or denied location permissions

Nearby locations surfaced dynamically based on user location

Text and image content associated with geotagged locations

# App Features

## Optional or Advanced Features

Audiovisual Content

Guided Walking Tours, either curated or custom generated for user

User-submitted locations / information (with review)

# Technical Details

Existing Frameworks and APIs to integrate

Google Maps integration

UA Login terminal

Location Permissions

# Initial Environment

Language, IDE, & Setup

Django  
Environment

Visual Studio

Python Language  
Basis
